🏠 Anush Thambimuthu 📧 ThambimuthuAnush24 📍 Colombo, Sri Lanka

Objective

Software engineer with internship experience building production-grade features across full-stack development and workflow automation. Skilled in integrating application modules using modern web and mobile technologies, with experience automating workflows and applying sound engineering principles. Seeking an **Associate Software Engineer** role to build on these skills.

Experience

Software Engineer Intern

Dec 2025 – Jul 2026

Viso Labs

- Developed a portfolio tracking module for managing buy/sell transactions, holdings, and performance history.
- Built stock analytics pages with market data, financial metrics, dividends, and charts for CSE-listed companies.
- Implemented market discovery features including top gainers/losers, heatmaps, and stock screeners.
- Designed sector comparison tools using market cap, dividend yield, EPS, and other financial indicators.
- Integrated n8n workflow automation to extract transaction data from broker PDF statements.

Education

University of Moratuwa

May 2023 – Present

B.Sc. (Hons) in Information Technology

Colombo, Sri Lanka

- CGPA: 3.40/4.00

Jaffna Vayavilan Central College

Jan 2008 – Aug 2021

G.C.E. Advanced Level (Physical Science Stream)

Jaffna, Sri Lanka

- Z-Score: 1.7865
- Combined Mathematics – A | Chemistry – B | Physics – B

Technical Skills

- **Programming Languages:** Java, C, Python, Dart, JavaScript
- **Web Development:** React.js, Next.js, Angular, Django, Spring Boot, FastAPI, Tailwind CSS
- **Mobile Development:** Flutter
- **Database:** MySQL, PostgreSQL
- **Cloud:** Firebase, AWS, Cloudinary, Railway, Docker, n8n
- **IDE & Tools:** Git, GitHub, VS Code, Postman, Codex, Cursor

Projects

HABITRO | Academic Project

2025

- An application where users can track habits through AI-powered habit suggestions, offering gamification features, reminders, and leaderboards.
- Implemented a secure authentication system for the Flutter mobile app and Admin dashboard, integrating token-based login, biometric sign-in (Face/Fingerprint), and social login (Google/Facebook) using Firebase and Meta APIs.
- Developed an interactive onboarding tutorial that introduces new users to key app features with restricted navigation to ensure full engagement.
- Engineered a gamified habit-tracking experience enabling users to explore habits, track progress, and earn rewards (points, gems) upon completion.
- 📁 GitHub repository

Automobile Service Management System | Academic Project

2025

- Developed a **microservices-based** system with modules for bookings, job assignment, parts inventory, billing, and live in-shop tracking, with role-based dashboards (Admin, Manager, Technician).
- Implemented data analytics for Admin, Manager, and Technician dashboards, and developed OTP and email notification services.
- 📁 GitHub repository

Money Manager | Individual Project

2025

- A simple application designed for managing finances and tracking expenses, allowing users to organize records, monitor spending, and maintain better control over their budget.
- Built a fully functional Income Tracker application with category selection, emoji icons, record management features, and **JWT**-based authentication for secure login.
- Implemented **input validation, category-based filtering, and confirmation modals** for secure and user-friendly interactions.
- Added real-time notifications and loading indicators to improve app responsiveness and user experience.
-  GitHub repository

Product Hub | Individual Project

2024

- Developed an application to manage electronic products, allowing users to track, maintain, and edit device information efficiently.
- Implemented full Create, Read, Update, and Delete functionality for product management with proper validation and error handling.
- Built using Spring Boot's **MVC** pattern with separate layers for controllers, services, and data models, ensuring a maintainable and extensible codebase.
-  GitHub repository

EduManage REST Service | Individual Project

2024

- Created a system to handle student information efficiently with structured layers and verified endpoints for smooth and reliable operations.
- Follows MVC pattern with proper separation of concerns using Controller, Entity, and Repository layers, making the codebase maintainable and scalable; tested and validated APIs using Postman to ensure performance and reliability.
- Provides full CRUD (Create, Read, Update, Delete) operations for student records through RESTful endpoints, enabling efficient student data management.
-  GitHub repository

Achievements & Certificates

- Introduction to DevOps – Coursera
- Foundations of Spring Boot & MVC Architecture – Coursera
- Full-Stack React with Spring Boot – Coursera
- Algo Xplore 1.0 Hackathon – NSBM Green University
- Code Rush Coding Competition – INTECS UOM

Extracurricular Activities

- TLA Treasurer
- AIESEC Member & Team Leader (oGV) – Colombo South
- Cricket, Volleyball, Football and Carrom

Soft Skills

Problem Solving | Time Management | Critical Thinking | Teamwork | Leadership | Communication
